

Try PARx for your PA's today!

- Go to www.PARxSolutions.com and click on "Submit a PA"
- If your practice is registered, enter your login credentials, or "Continue as Guest User"
- Guest Users enter their NPI and code from the fax letter. Registered users click on 'Create a PA' and then enter in their code from the fax letter (or click on Invitations icon) to generate the pre-populated PA.
- Complete the PA request. (Prescriber will need the patient address & prescription plan information, plus any clinical information required.)
- Submit.
- PARx will do the rest.

Pre-populated PA

PARx Solutions® utilizes a universal PA format for all health plans. Once a PA is submitted, PARx professional staff then manage the PA in its entirety including follow-up with the plans.

For certain products, when a patient uses their copay card at the pharmacy or calls into the product's HUB support program and is flagged as 'PA Required', the copay card or HUB provider sends PARx a subset of data.

PARx starts the PA in PASS® (Prior Authorization Support System) and sends the patient's HCP a fax letter with steps on how to complete the PA.

"You can submit a PA in a few short minutes - that saves time for staff and can help get medications to patients sooner." - Physician
